

Read the stack you run, add the intelligence layer, keep your source of truth.

Tidal Wave reads from HubSpot, Marketo, Salesforce, and Snowflake, enriches at the person level, and writes back into the tools your team already uses. Not a CDP. Nothing re-platforms.

READ

Connectors, not migration

Pulls content, people, engagement, and promotions from the tools you already run. Nothing re-platforms.

ENRICH

Person-level intelligence

Content intelligence, channel affinity, buying groups, and cadence. Per person, per tenant.

WRITE BACK

Audited writeback

Predictions land as properties your team already uses. Logged, reversible, kill-switched.

See the architecture for your stack.

Book a 30-minute walkthrough. Early access, design-partner terms.
