

No keys, no friction, no security review, Wave still connects.

Wave onboards your full contact and engagement history with no OAuth and no API keys, by secure file upload or a read-only Snowflake view your team controls.

WHAT WAVE READS
A view you control

READ ONLY

SOURCE FILE OR WAREHOUSE
Never modified

PATH ONE

Secure File Source

Upload a CSV of people, engagement, and promotions. Review every row, then approve.

PATH TWO

Snowflake Read

Wave reads a view your team publishes with key-pair JWT, the model IT already approves.

WHERE IT LANDS

Nothing Modified

Both paths are read only. Wave produces intelligence and writes predictions back to HubSpot.

Pick how Wave connects.

Request a demo. Book a 20-minute walkthrough on your security constraints.
